## Environmental and energy policy

### RESPONSIBILITY as a COMPANY

The activity of our company is aimed at improving the living conditions of people in the world and at the same time reducing the environmental impact as much as possible.

### CORPORATE POLICY

Within the framework of this objective, we promote processes and activities that are environmentally friendly and energy-efficient, so that CO2 emissions can be reduced and valuable resources can be recycled. This also includes careful control of the use of chemical substances, the most efficient use of electrical energy and other forms of energy possible, and continuous efforts to improve our environmental and energy management system.

- To this end, we set targets in terms of environmental and energy management and propose measures which are then implemented and regularly reviewed.
- We pay attention to conformity with applicable laws and guidelines as well as to the compliance with corresponding agreements with our partners.
- Finally, we strive for training and awareness of environmental issues and energy efficiency.
