Thank you for choosing the Vossloh-Schwabe Blu2Light system. Prior to using the product, please read this operating manual to familiarise yourself with the system's functions.

Any person tasked with system setup, commissioning, operation, maintenance and repair must

- be suitably qualified and
- closely observe the provisions of this operating manual.

■ DOWNLOADING THE APP

Both apps are available as iOS version in the App Store. Additionally, the Android version of the LiNA Touch app is available in the Google Play Store.

LiNA – Configuration and Operating App for Blu2Light

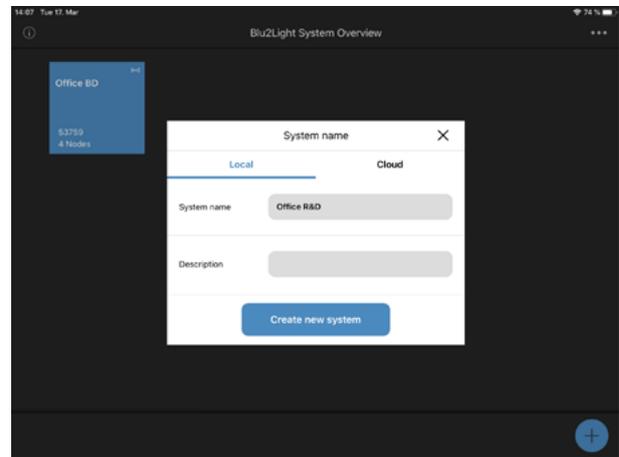

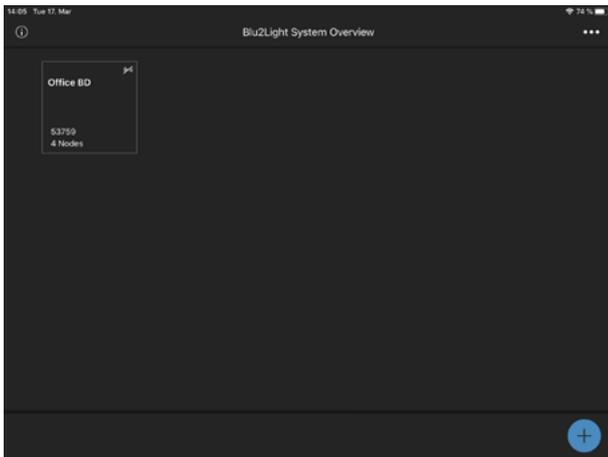

■ INTRODUCTION TO THE SYSTEM

Once you have successfully downloaded LiNA Connect and LiNA Touch from the app store, respectively from the Google Play Store, open LiNA Connect to start programming the Blu2Light system.

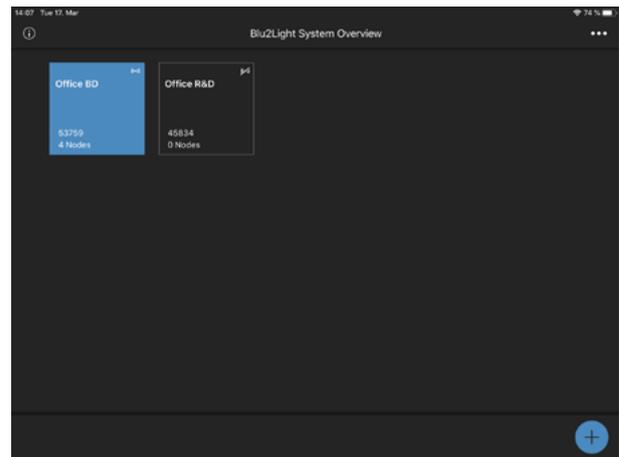

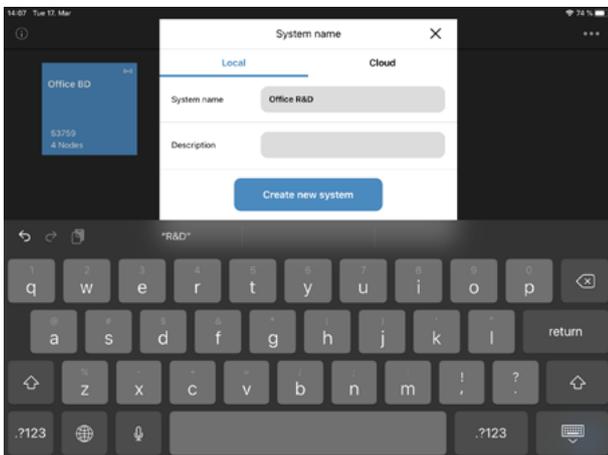

■ CREATING / ADDING A NEW SYSTEM

Press **+** in the lower right corner.

Confirm with **CREATE NEW SYSTEM**.

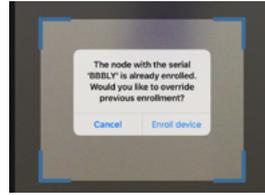

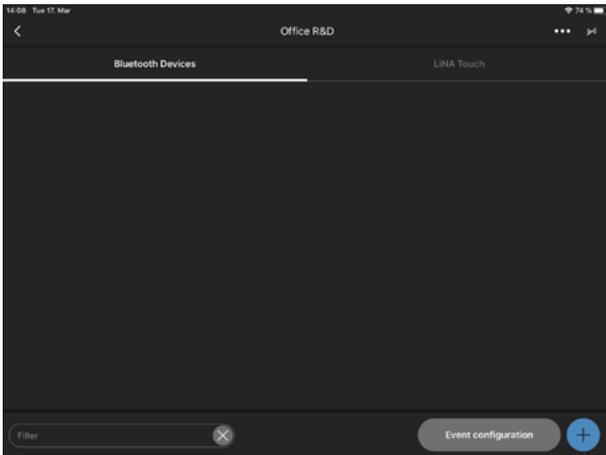

The new system appears as a dark square.

LiNA – Configuration and Operating App for Blu2Light

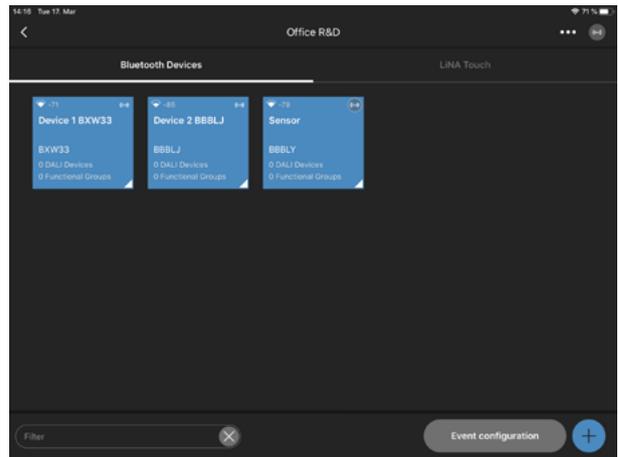

■ ADDING BLUETOOTH® DEVICES

Click on **+** in the lower right corner.

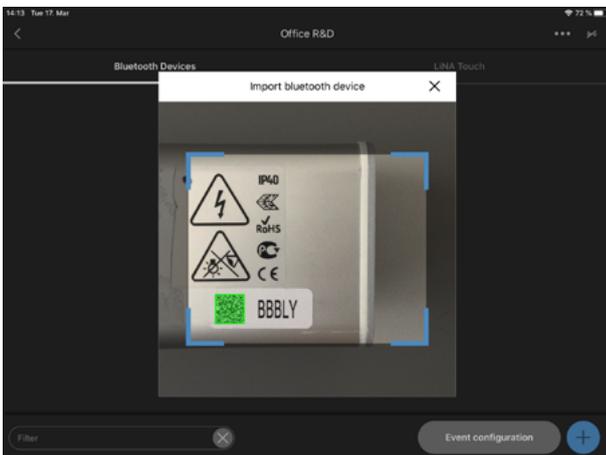

Click on **ENROLL DEVICE**.

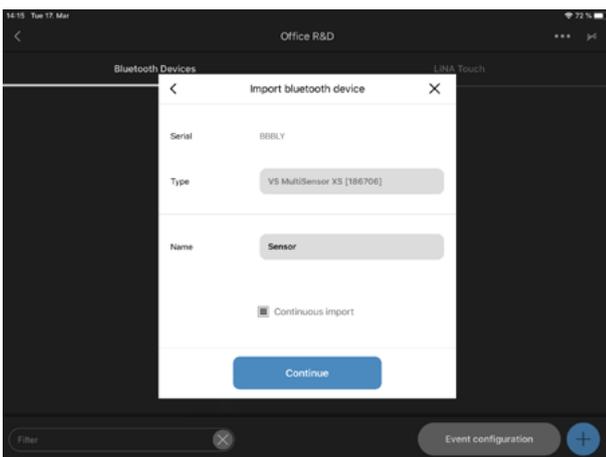

The successfully added Bluetooth device appears in a blue highlighted square.

Scan the QR code on the Bluetooth® device.

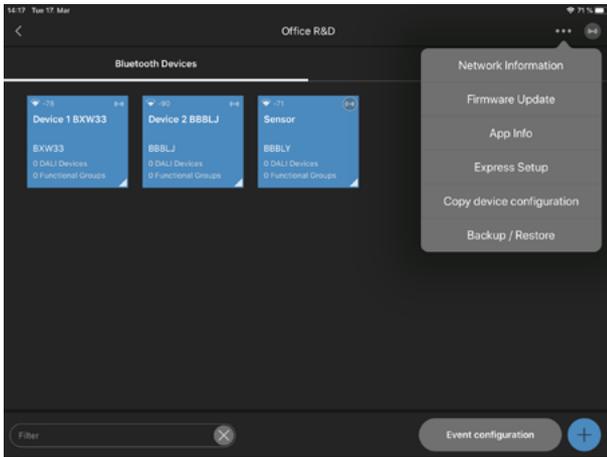

Name the new Bluetooth® device and confirm with **CONTINUE**.

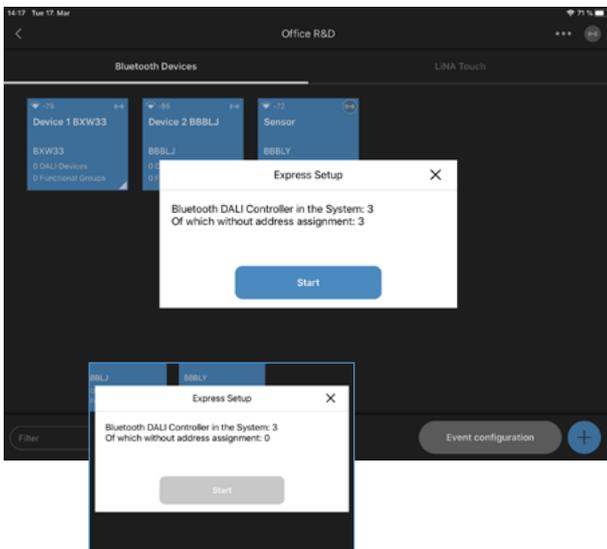

LiNA – Configuration and Operating App for Blu2Light

■ EXPRESS SETUP

Click on  in the top right corner. Select "Express Setup".

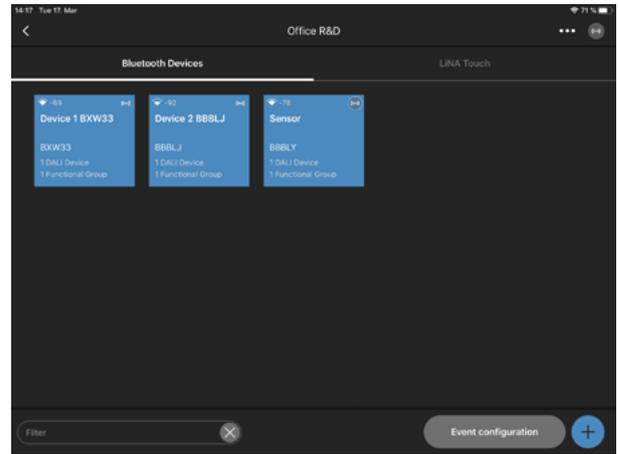

Confirm with **START**.

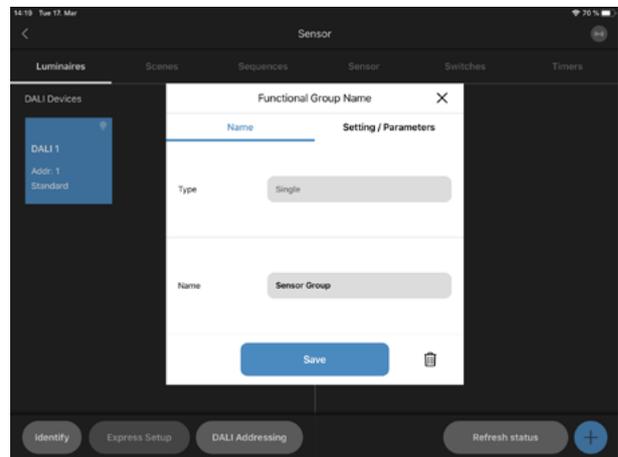

A successful express setup means

Each Bluetooth device searches for all connected DALI devices and creates a function group. All DALI devices are connected to this function group.

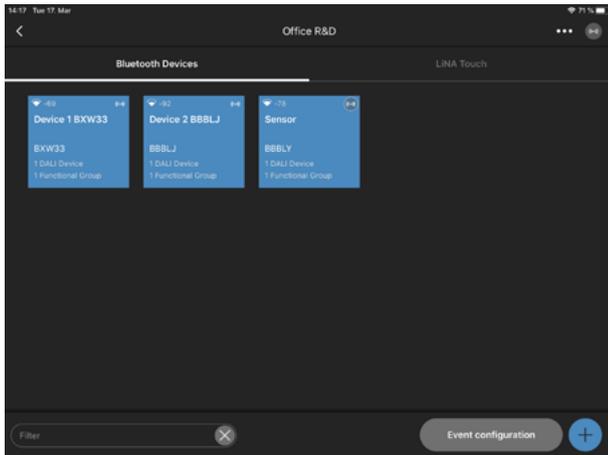

Name the function group and confirm with **SAVE**.

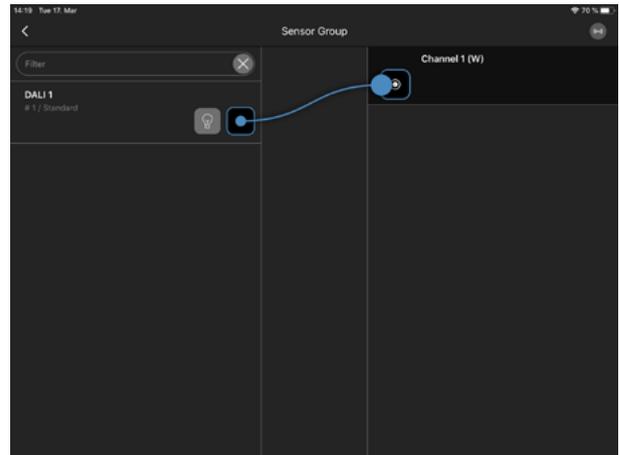

LiNA – Configuration and Operating App for Blu2Light

MANUAL DALI ADDRESSING

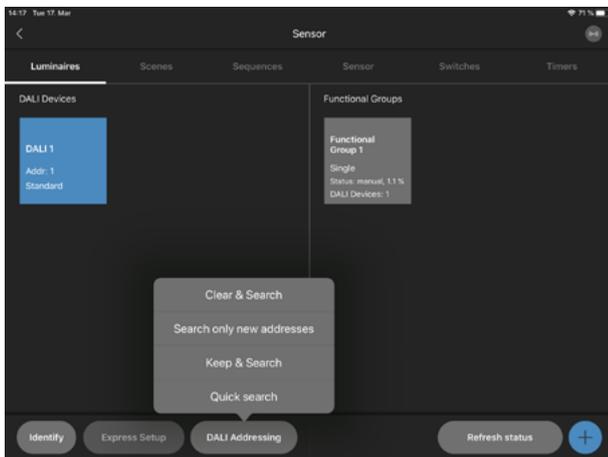

Select a Bluetooth® device.

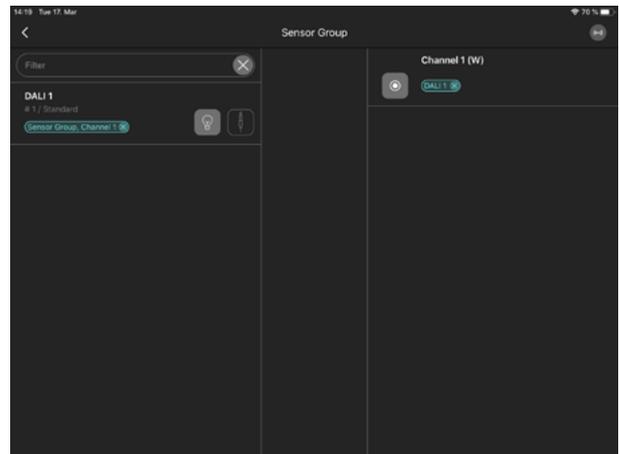

Use the plug symbol to group the luminaires by drag & drop.

Click on **DALI ADDRESSING** "Delete & Search".

If the grouping was successful, an entry appears under each DALI device.

If the DALI addressing was successful, all DALI devices are highlighted as a blue square.

Click on **+** in the lower right corner to create a new function group.

Select the group type. The type of the group depends on how many channels the DALI driver/luminaire has.

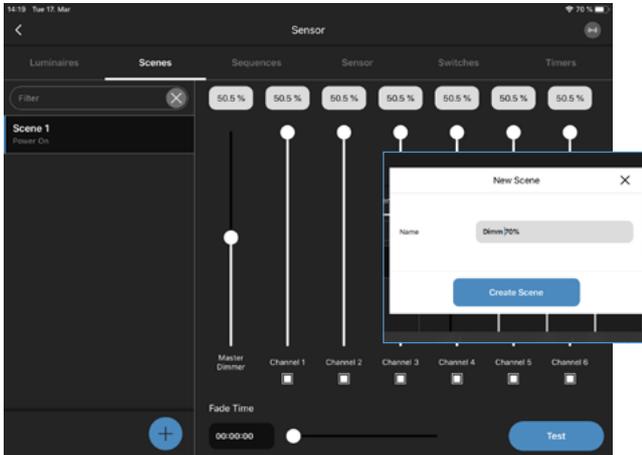

LiNA – Configuration and Operating App for Blu2Light

■ CONFIGURATION OF SCENES

Click on **+** in the bottom row.

Name the new scene.

Confirm with **CREATE SCENE**.

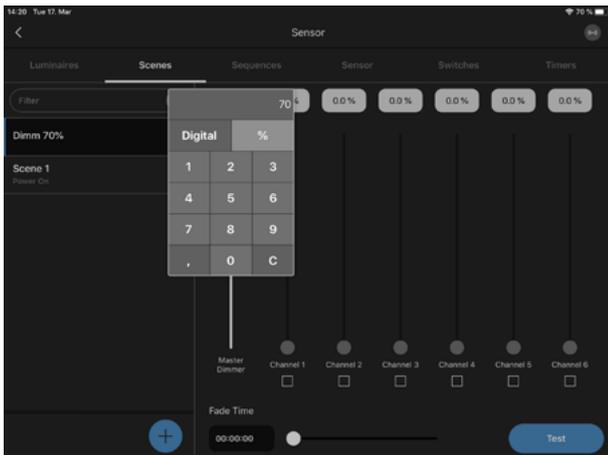

Click on **TEST** in the lower right corner to test the scene on a functional group.

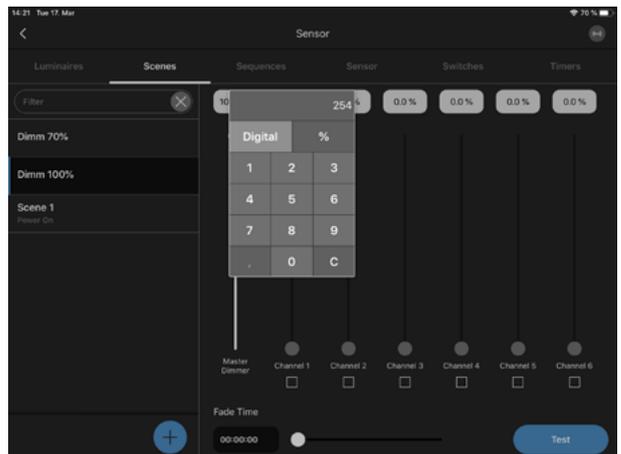

Click on the "% value" above channel 1.

Enter the desired light value as %-value.

The "Digital value" allows to insert a DALI value.

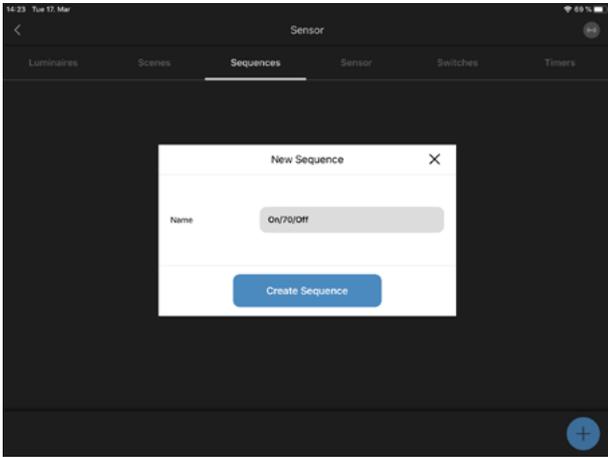

LiNA – Configuration and Operating App for Blu2Light

■ CONFIGURATION OF SEQUENCES

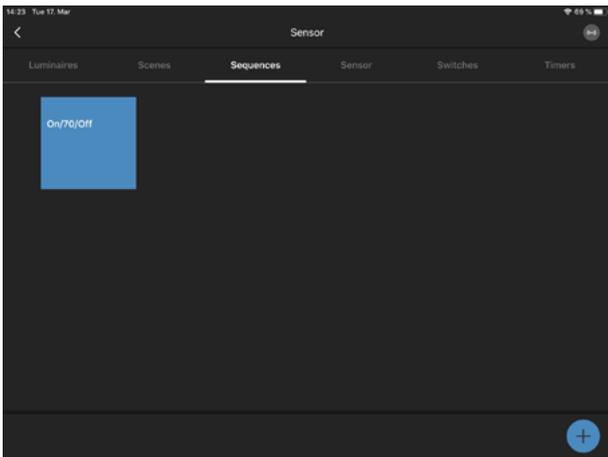

Click on **+** in the bottom right corner.

Name the new sequence.

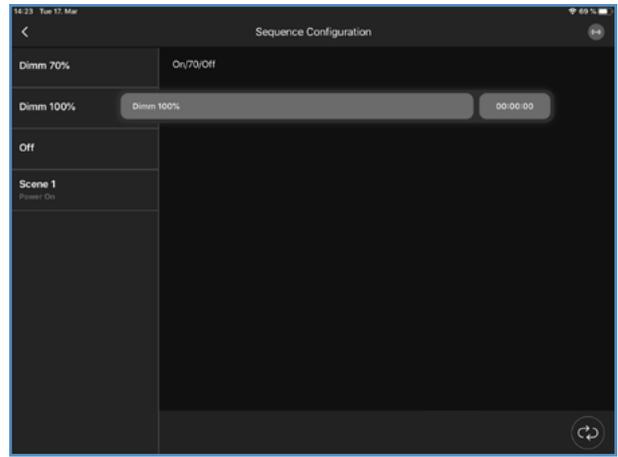

Confirm with **CREATE SEQUENCE**.

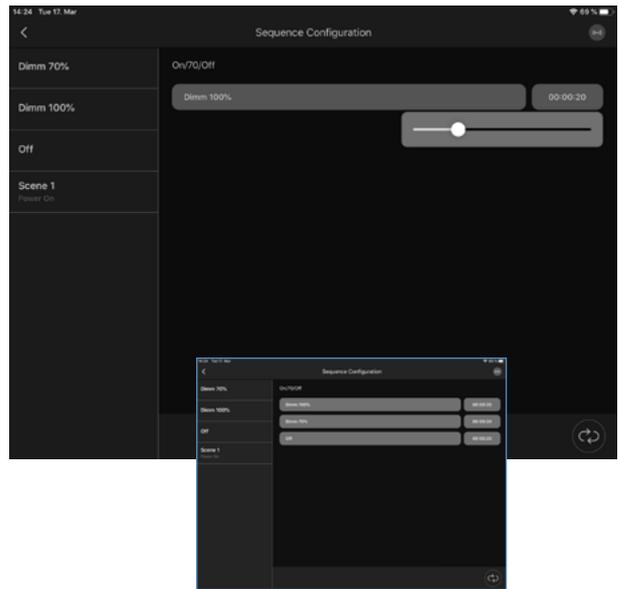

The new sequence appears in a blue highlighted square. Select the new sequence.

Drag and drop the different scenes into the sequence.

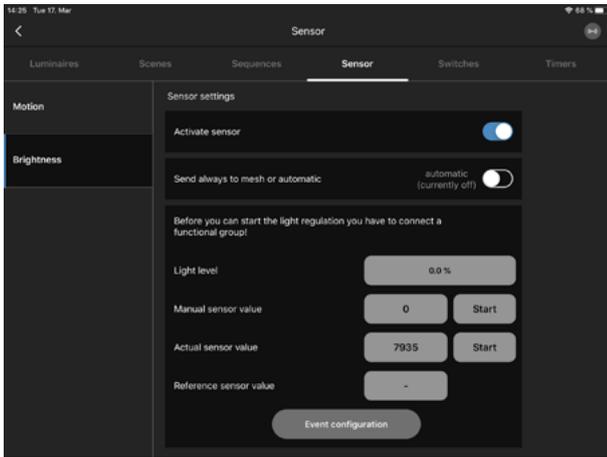

Go to the time value button **00:00:00** and select the "Runtime" of each step in the new sequence.

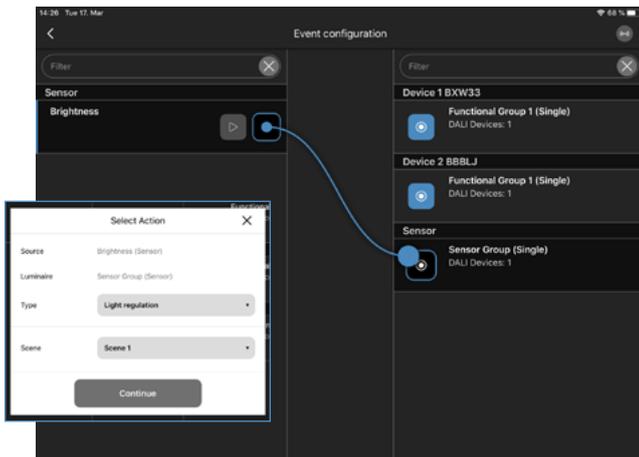

LiNA – Configuration and Operating App for Blu2Light

■ CONFIGURATION OF THE BRIGHTNESS SENSOR

Click on "Activate sensor" to activate the brightness sensor. Click on **EVENT CONFIGURATION**.

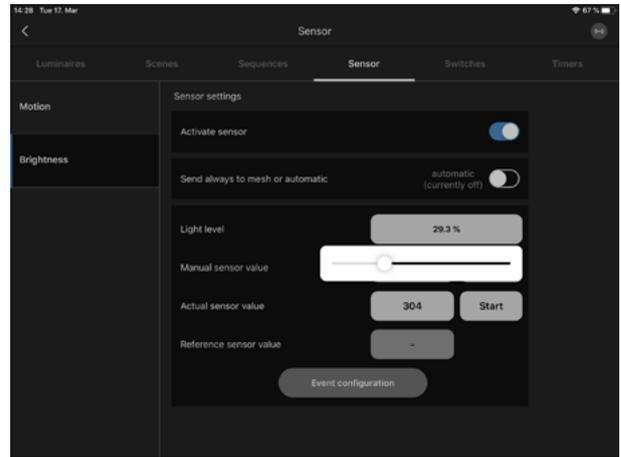

Use drag and drop to add the brightness sensor to any function group that requires brightness detection. Confirm this with **CONTINUE**.

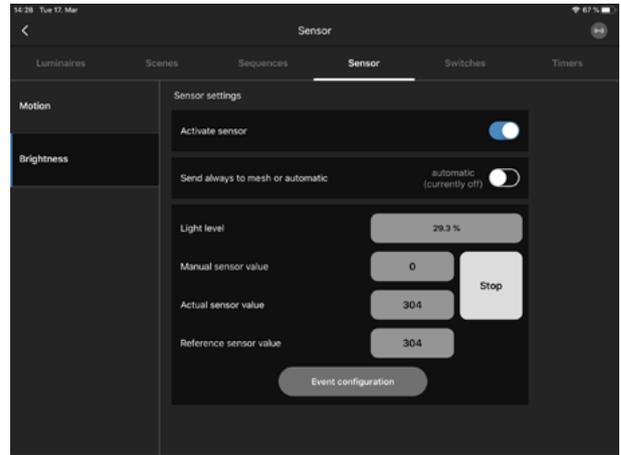

Click on "Light level" and define the desired light level with the slider.

Wait a few seconds and check whether the "Current Sensor Value" has changed.

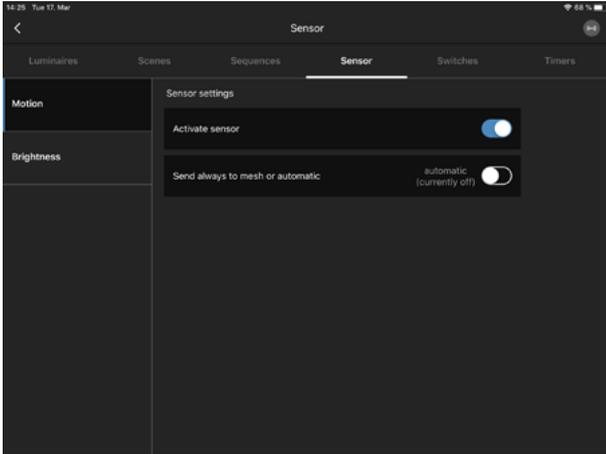

Click on "Start" to confirm the configured light level and the reference value of the sensor.

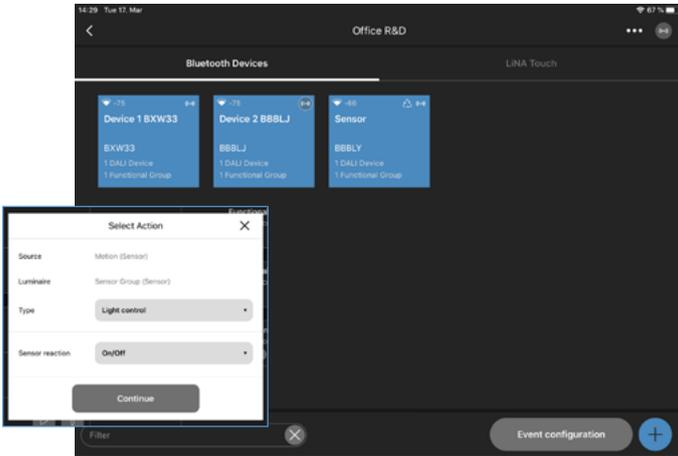

LiNA – Configuration and Operating App for Blu2Light

■ CONFIGURATION OF THE MOTION SENSOR

Click on "Activate Sensor" to activate the motion sensor.

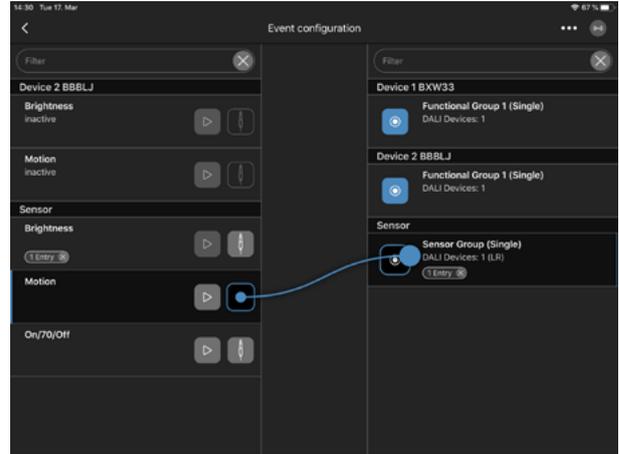

Switch back to the overview of Bluetooth® devices. Click on **EVENT CONFIGURATION**.

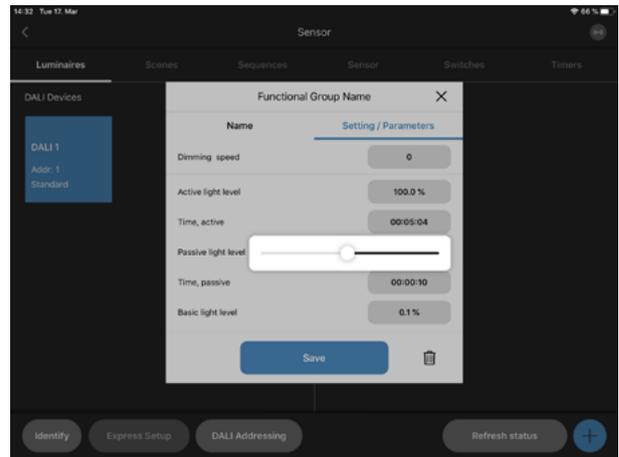

Drag and drop the motion sensor to any function group that requires motion detection.

Select "Light control" as the type.
Select "On/Off" as the sensor response.
Confirm with **CONTINUE**.

Select each function group with a long touch to set the motion sensor parameters.

- "Active light level" & "Time, active"
Appears when the motion sensor detects something
- "Passive Light Level" & "Time, Passive"
'Appears when the time, active, has expired.
- "Basic brightness"
Appears when "Time, passive" has elapsed and the motion sensor does not detect anything.

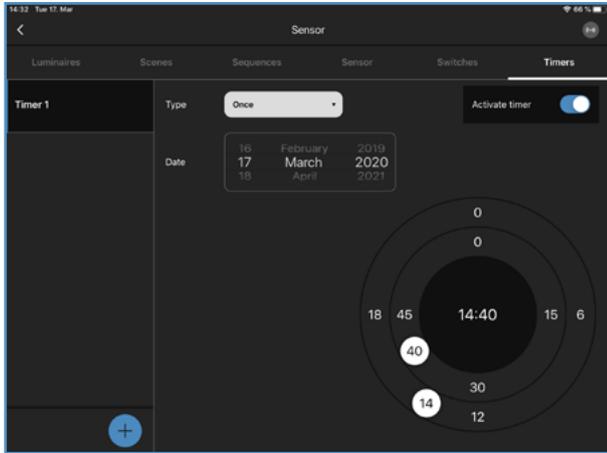

LiNA – Configuration and Operating App for Blu2Light

■ CONFIGURATION OF THE TIMER

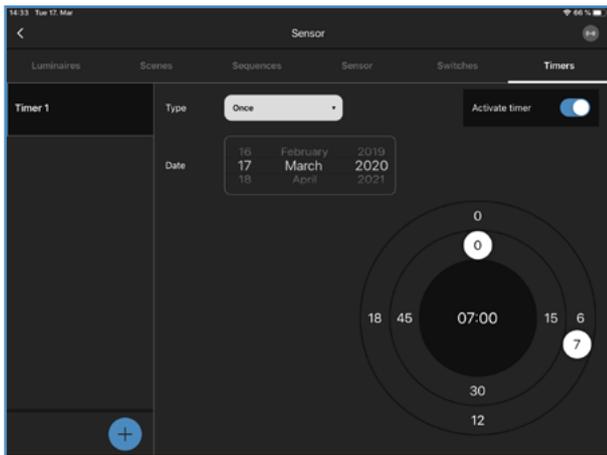

Click on **+** in the bottom line of this page to create a new timer and name the timer.

Click on **CONTINUE** to activate the timer.

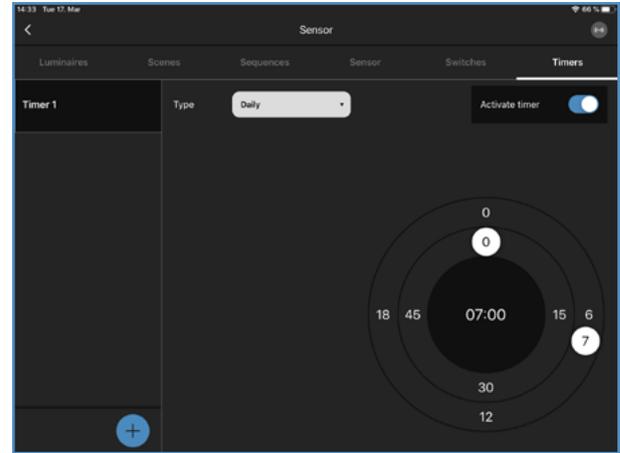

Select the time required using the two circles on the right.

- Setting the date
- Outer circle, for setting the hours
- Inner circle, to set the minutes

Use "Type" to select when the timer should act.

Options to choose from: Once, daily, weekly

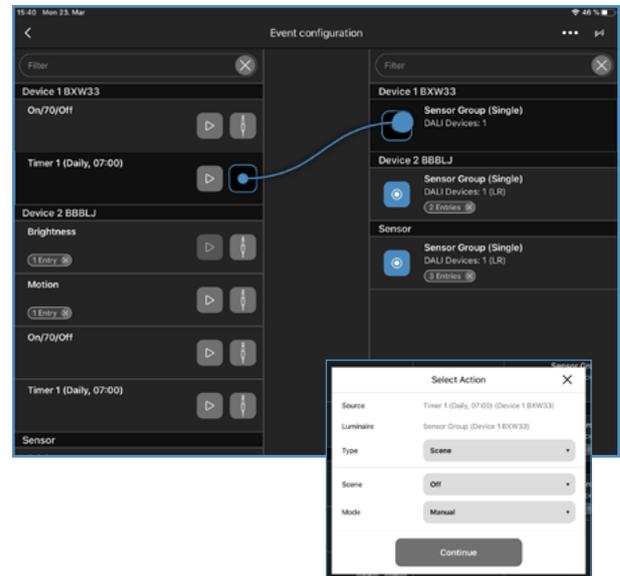

Go to **EVENT CONFIGURATION** on the Blu2Light system overview. Insert the "Timer" into the correct function group by drag & drop. Select "Type".

Example type: Scene

Select the scene to be displayed.

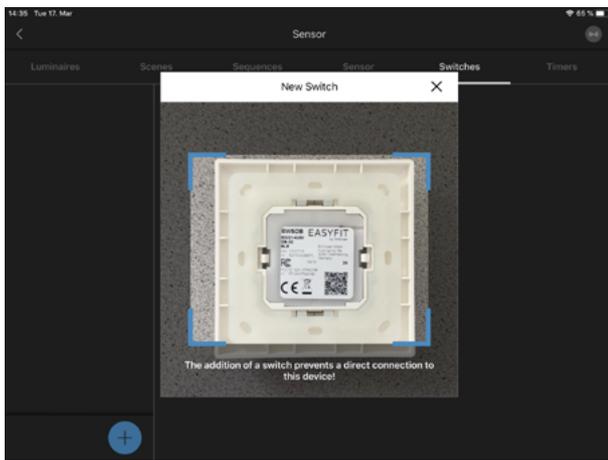

Select the "Mode" system.

You can change the "Mode" of the system with the timer.

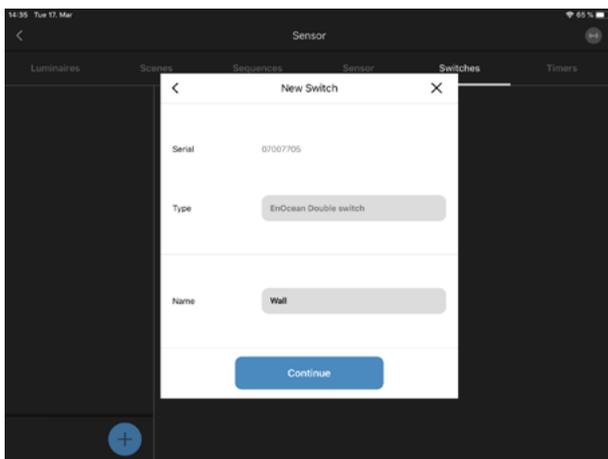

■ CONFIGURATION OF THE BLUETOOTH® SWITCH

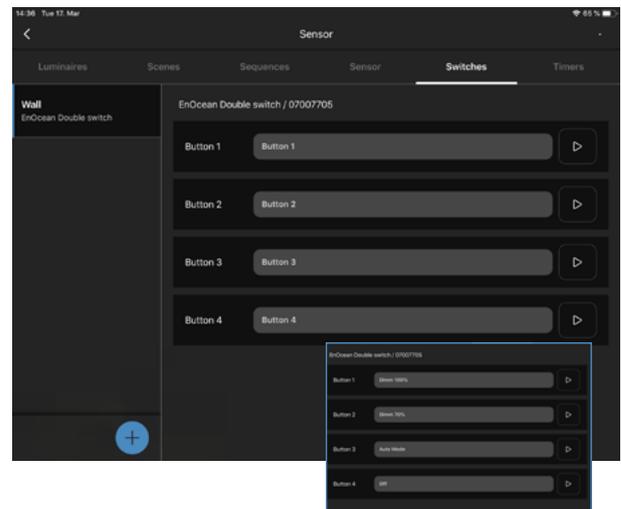

Click on **+** in the bottom row of the page to add a Bluetooth® switch and scan the QR code of the device.

Name the new Bluetooth® switch.
Confirm with **CONTINUE**.

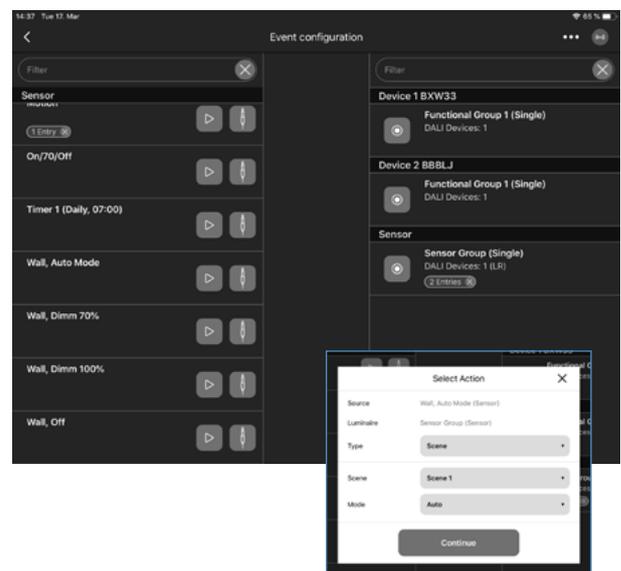

Name all 4 buttons of the new Bluetooth® switch.

Go to the **EVENT CONFIGURATION** on the Bluetooth devices overview page. Use Drag & Drop to add all 4 buttons to the correct function group.

Select the type, e.g. a scene and the system mode "Mode".

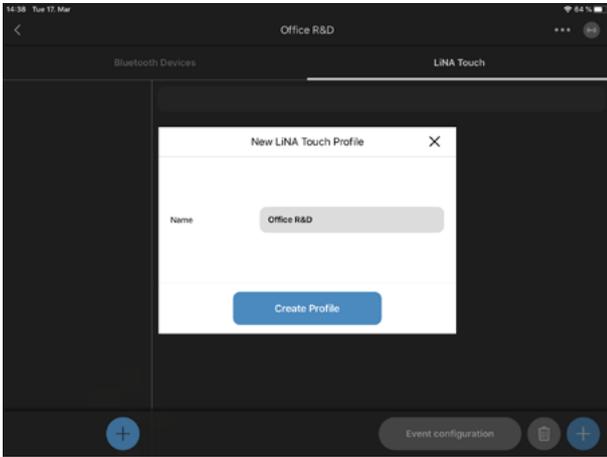

- Auto mode: Sensors & timers are activated
- Manual mode: Sensors & timers are deactivated

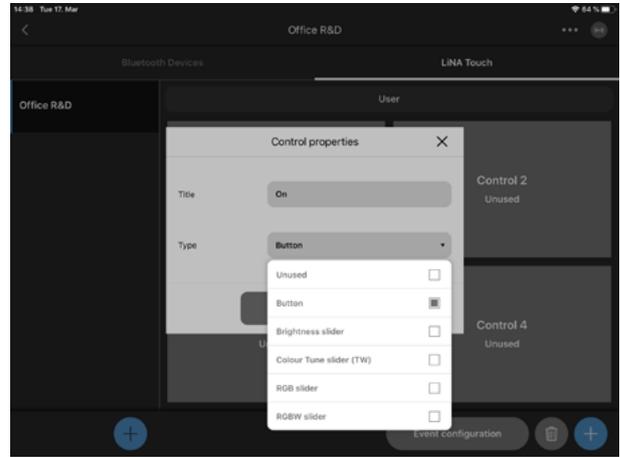

LiNA – Configuration and Operating App for Blu2Light

■ CONFIGURATION OF THE LiNA TOUCH PROFILE

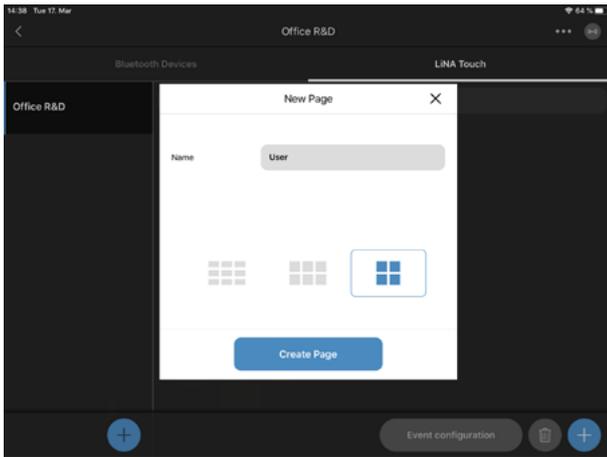

Go to the “LiNA Touch” page. Click on the black **+** on the left side of the bottom row to create a new LiNA Touch profile. Name the new LiNA Touch profile and confirm with **CREATE PROFILE**.

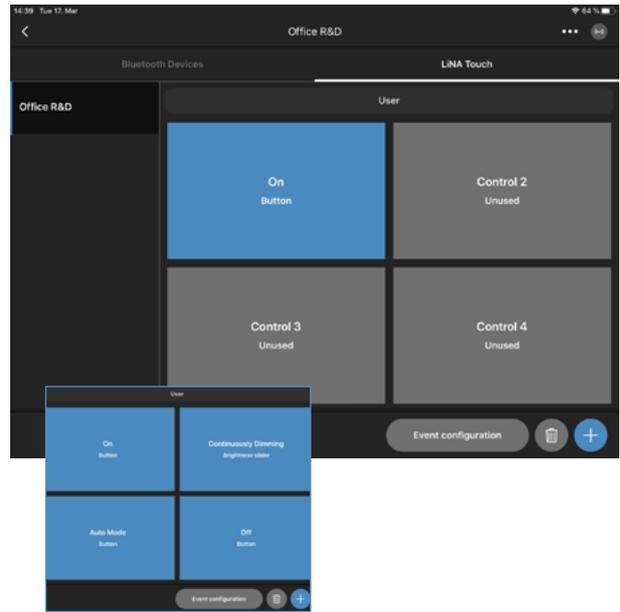

Select a control field by touching it.
Name this control field.
Select a type for the control field.
Confirm it with **SAVE**.

Click on the white **+** on the right side of the bottom row to add a new page for the LiNA Touch profile. Choose how many control fields you need. Confirm with **CREATE PROFILE**.

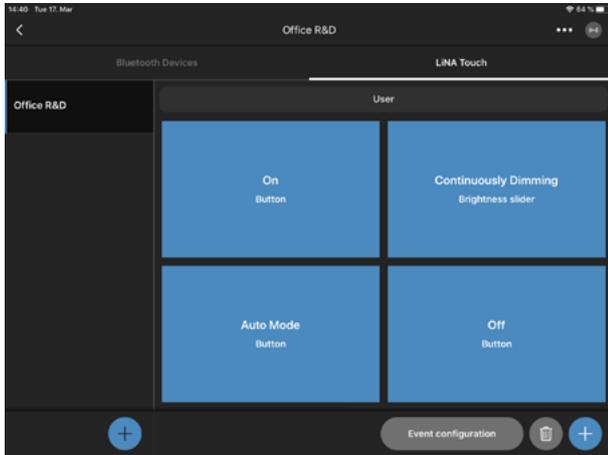

Repeat these steps until all control fields are marked blue.

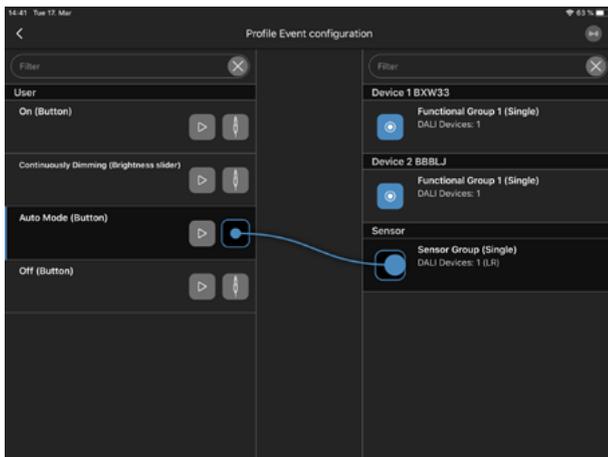

■ EVENT CONFIGURATION FOR THE LiNA TOUCH PROFILE

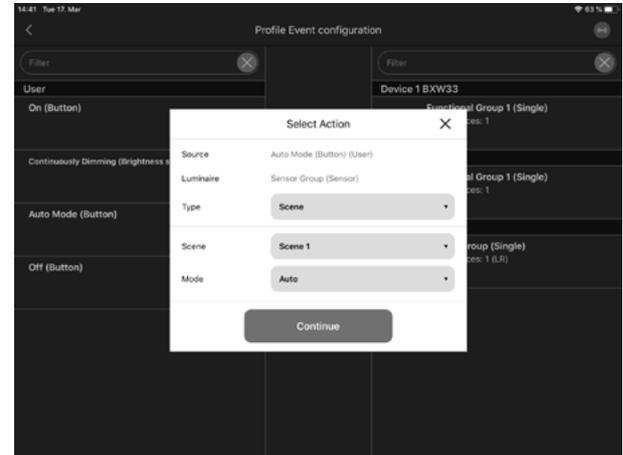

Click on **EVENT CONFIGURATION** on the right side in the bottom line to configure the LiNA Touch profile.

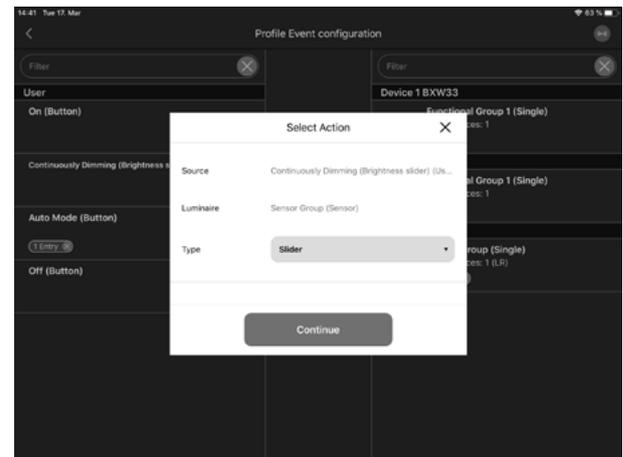

Insert all LiNA Touch control panels by drag & drop into the correct function group.

To configure a scene button, select for each control field: Type, Scene and Mode

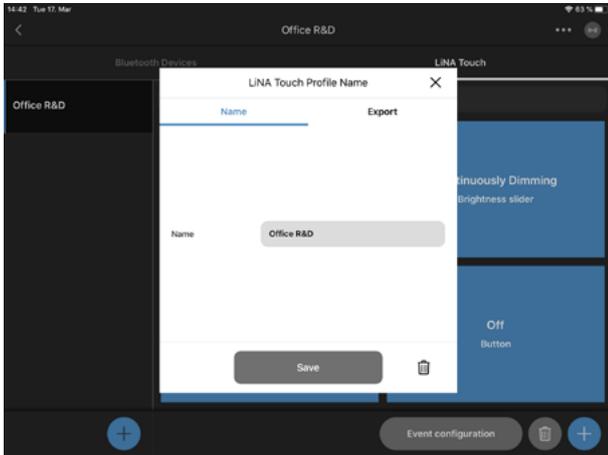

To configure a slider, simply drag and drop the control field to the correct function group. Confirm with **CONTINUE**.

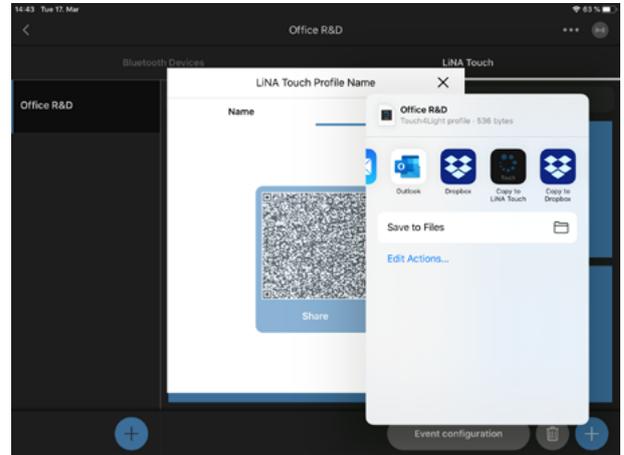

LiNA – Configuration and Operating App for Blu2Light

■ TRANSFER OF THE PROFILE TO THE LiNA TOUCH-APP

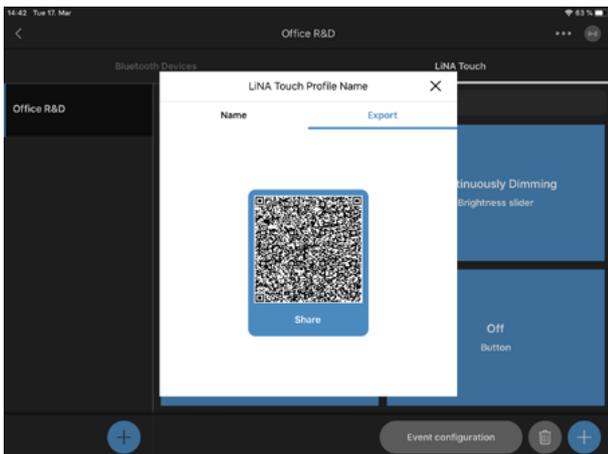

Hold your finger for a long time on the profile that you want to transfer. Select “Export”

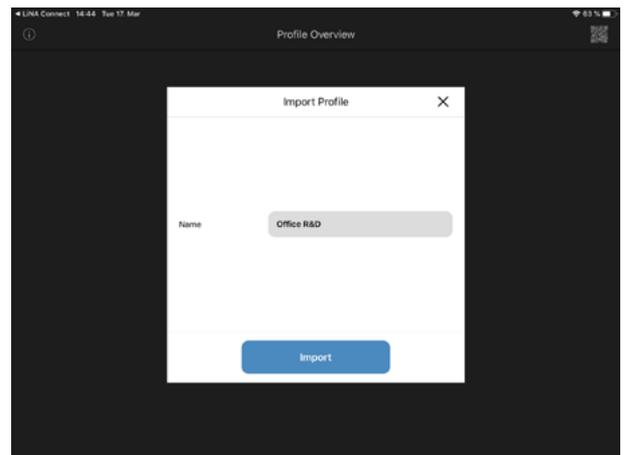

Select the LiNA Touch App.
Click on “Copy to LiNA Touch” and
LiNA Touch App will open automatically.

Click on **SHARE** to export the LiNA Touch profile.

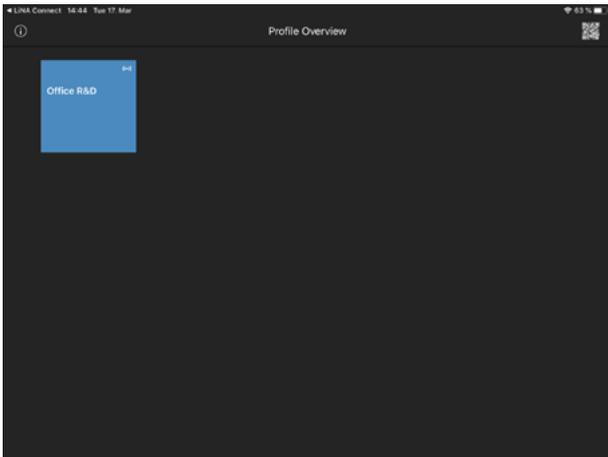

Choose **IMPORT** and the LiNA Touch profile is successfully imported into the LiNA Touch App.

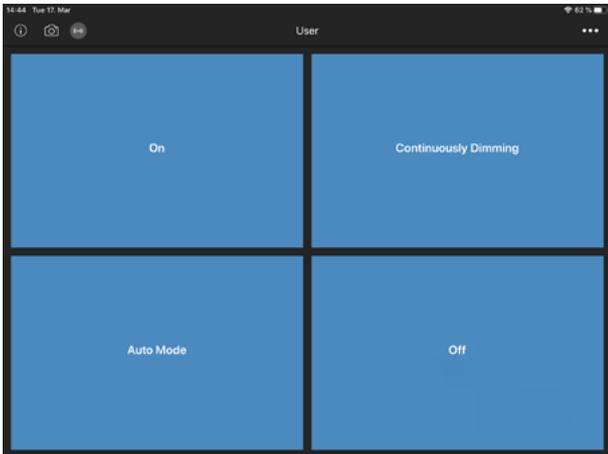

LiNA – Configuration and Operating App for Blu2Light

LiNA TOUCH SETTINGS

Select the LiNA Touch profile.

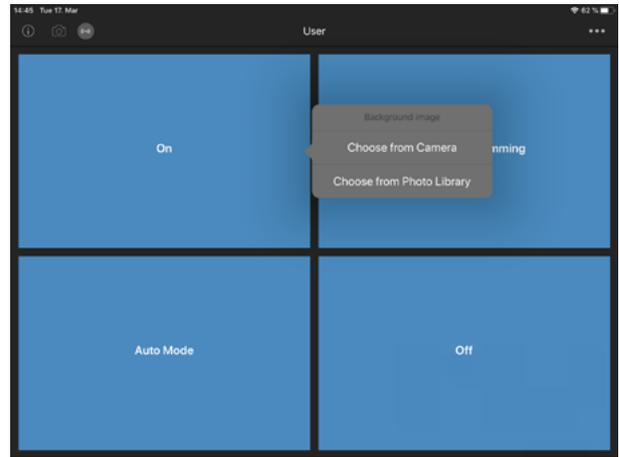

Test all LiNA Touch control panels.

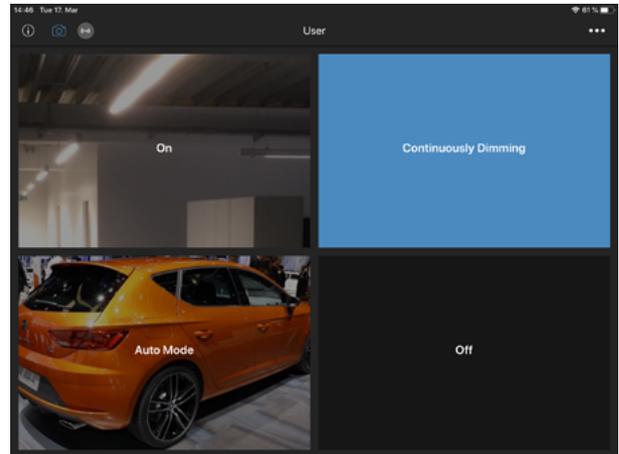

To change the background of each control panel, click on the "camera icon" in the upper left corner.

Select a control field.
Choose between:
... from camera
... from the photo library

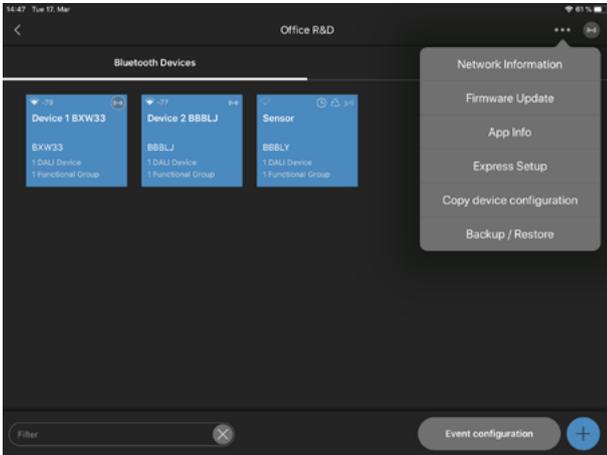

The selected image appears in the background of the control panel.

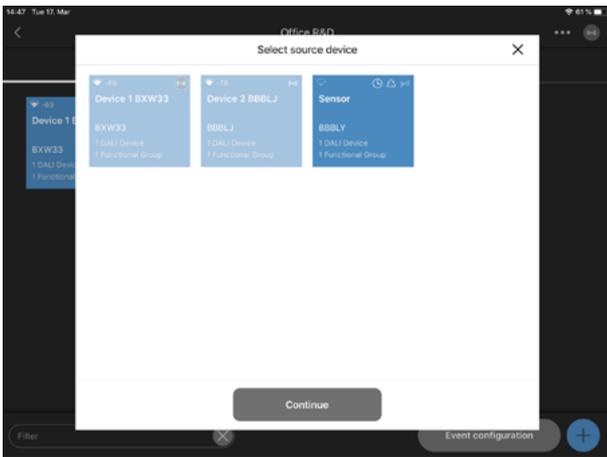

LiNA – Configuration and Operating App for Blu2Light

■ COPYING THE CONFIGURATION OF A BLUETOOTH DEVICE

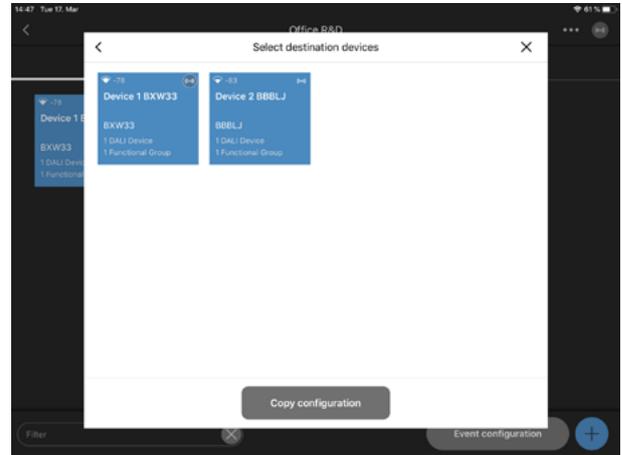

Click on  in the upper right corner. Select “Copy Device Configuration”.

Select the “source device”. Confirm with **CONTINUE**.

Select “Target devices”. Click on **COPY CONFIGURATION**.

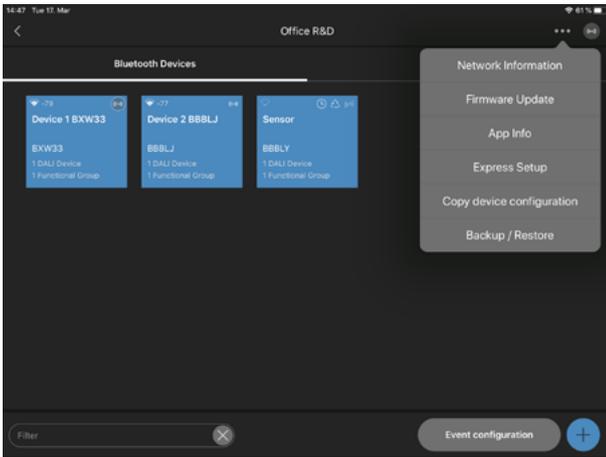

The system starts copying the configuration of the source device to the destination device.

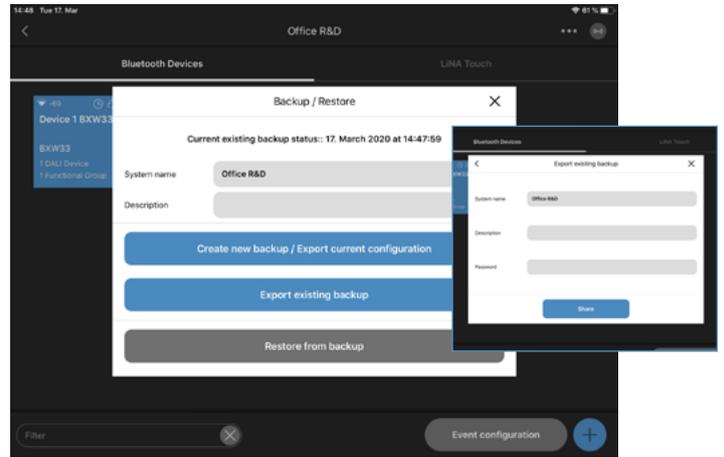

LiNA – Configuration and Operating App for Blu2Light

■ BACKUP/RESTORE

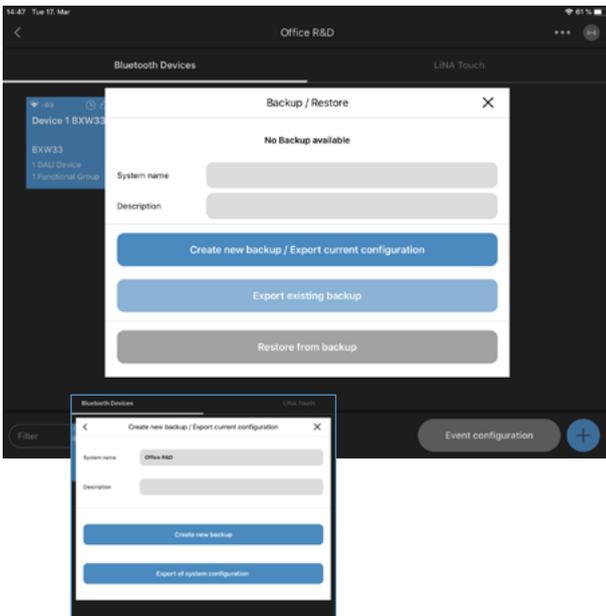

Click on  in the upper right corner.
Select "Backup/Restore".

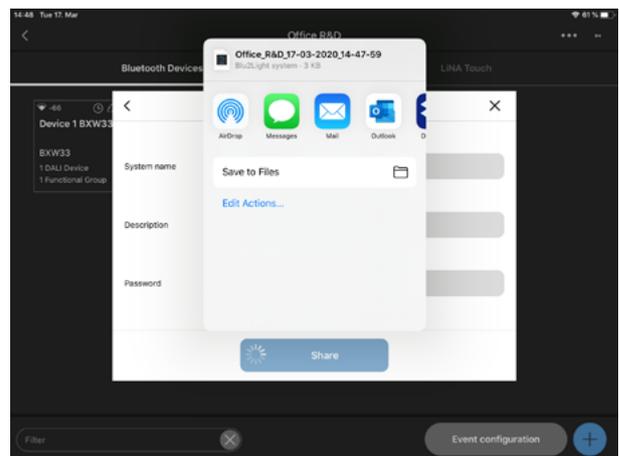

Click on "Export existing backup".
Click on "Share".

Name the new backup. Click on
"Create new backup / Export current configuration".

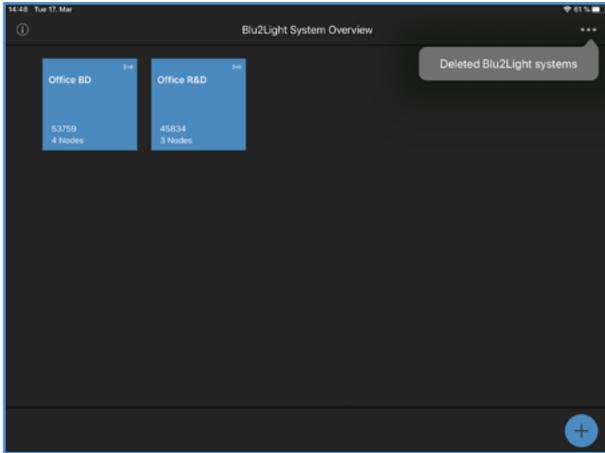

Select with whom the backup is to be shared or how it is to be saved.
Recommended options for data sharing: e-mail, AirDrop
Recommended saving option: Save to files

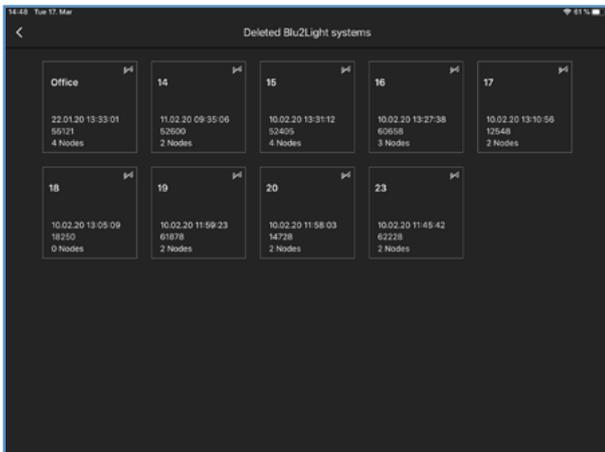

RECOVERY OF A DELETED SYSTEM

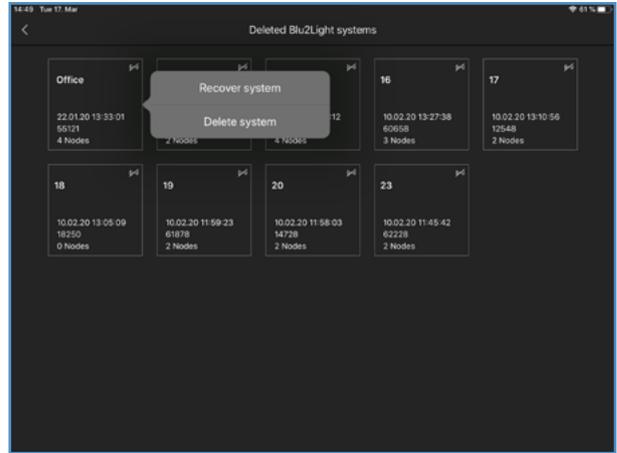

Go to "Blu2Light system overview".
Click on  in the upper right corner.
Select "Deleted Blu2Light systems".

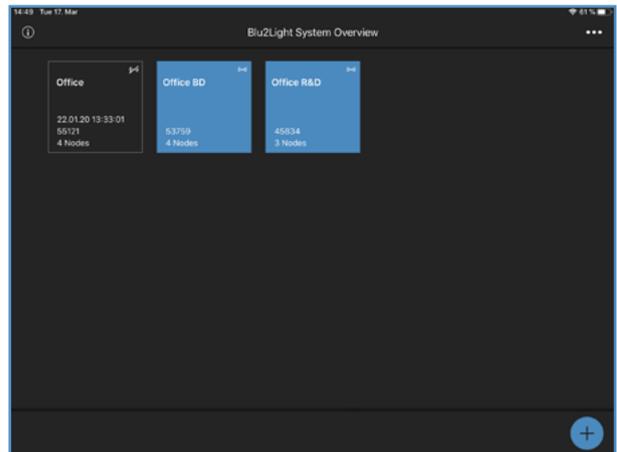

Select the Blu2Light system to be restored.
Select the system with a touch.

Click on "Restore System".

The system has been successfully restored
when it appears again in the "Blu2Light system overview".

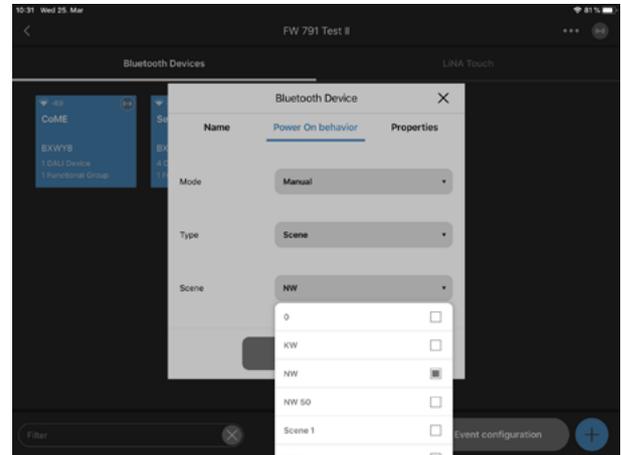

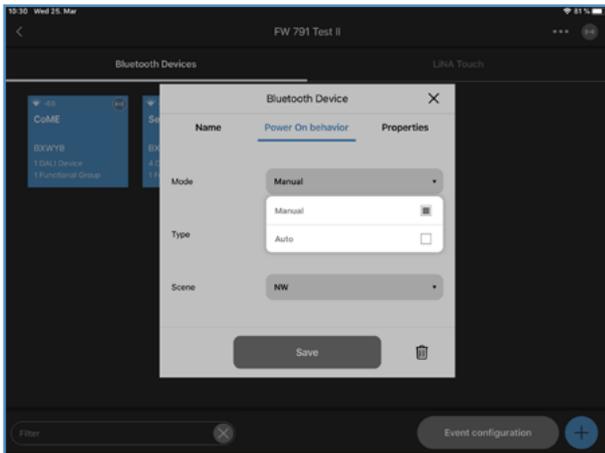

LiNA – Configuration and Operating App for Blu2Light

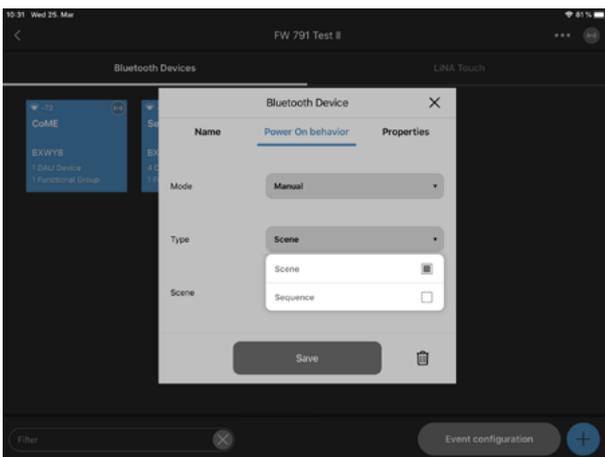

■ POWER-ON BEHAVIOUR

Go to the "Bluetooth device overview".
Select a Bluetooth device with a long tap.
Select "Power On Behaviour".
Select the "Mode" in which the system should start after a power failure.

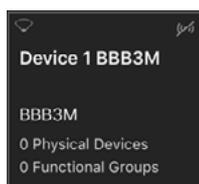

Select the scene or sequence to be executed after a power failure.
Confirm with **SAVE**.

Select whether a scene or sequence should appear after a power failure.

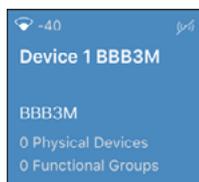

■ LEGEND OF SYMBOLS USED IN THE APP

Dark Background

The device (node) is not accessible via the network (will be checked every 15 seconds).

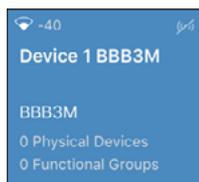

Blue Background

The device is accessible.

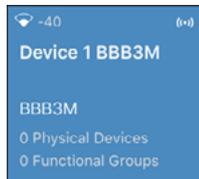

Meaning of Symbols

1. Signal strength, measured when received by an iPad
2. Gateway
3. Synchronisation
4. Faulty connection between mesh and light controller
5. Timer configured
6. Sequence configured
7. Connection display

Faulty connection between mesh and light controller

Whenever a luminaire goes on around the world, Vossloh-Schwabe is likely to have made a key contribution to ensuring its trouble-free operation.

Headquartered in Germany, Vossloh-Schwabe counts as a technology leader within the lighting sector. This success is based on Vossloh-Schwabe's top-quality and high-performance products.

The product range includes the entire spectrum of lighting components from LED systems with matching control gear, modern control systems (Blu2Light und LiCS) as well as electronic and magnetic ballasts and lampholders.

For the future, the company is geared towards the topic of smart lighting.
