LEDSPOTS CC

ACTIVE PLUS – 36 V
GEN. 3

MODULAR LED SPOTS AND ENGINES FOR MULTIPLE OPTICS CONFIGURATIONS

One of the main characteristics of this LED spots and engines is their flexibility. The modularity of these LED engines allows you to combine different lenses and reflectors in order to get the result you expect.

Moreover, with its easy to fit technology you connect lenses or reflectors in a blink of an eye – just click it in.

Typical applications for LEDSpots

Integration in luminaires

- Residential lighting
- Retail lighting
- Hospitality lighting
- Museum lighting

Active Plus – 36 V

- **MODULAR SYSTEM: ENGINE + REFLECTORS**
- **NARROW COLOUR TOLERANCES: 3 STEP MACADAM**
- **COLOUR RENDERING INDEX: CRI 92**
- **LUMINOUS FLUX: UP TO 1400 LM (CRI 92)**
- **MADE IN ITALY**

MADE IN ITALY

Active VCA2-123 PLUS – up to 350 mA

Technical notes

Reflector: Ø 50 mm, heat sink material: aluminium
Lumen maintenance: L80/B10; 50,000 hrs. 75 °C at t_p point
Max. operating temperature at t_c point: 80 °C
Temperature depends on installation situation and
has to be checked by the luminaire manufacturer.
Colour accuracy initially: 3 SDCM
Plastic clear cover to protect reflector (opaque cover on request)
Leads: Cu tinned, stranded conductors 0.5 mm²,
length: 200 mm, stripped lead ends (with plug on request)
With integrated cord grip
Packaging unit: 28 pcs.

LED Engines for Active PLUS and Evolve 50

LEDSpot engine equipped with LED module, holder, thermal pad, heat sink and leads but without reflector or lenses

Engines at 350/300 mA

Engines at 200/150 mA

LEDSpot Engine HALO

Technical notes

For reflectors PLUS and lenses Evolve
Optics fixation: click-in
Heat sink material: aluminium/thermoconductive resin
Lumen maintenance:
L80/B10
50,000 hrs. at max. allowed operation current and
75 °C at t_p point
Temperature depends on installation situation and has to be checked by the luminaire manufacturer.
Colour accuracy initially: 3 SDCM
Leads: Cu tinned, stranded conductors 0.5 mm²,
length: 200 mm, stripped lead ends (with plug on request)
With integrated cord grip
Packaging unit: see page 10

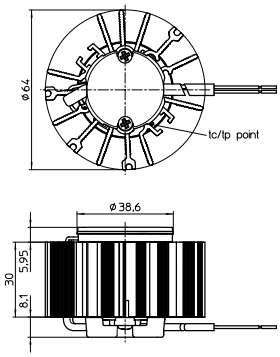
Maximum ratings

Exceeding the maximum ratings can lead to reduction of service life or destruction of the modules.

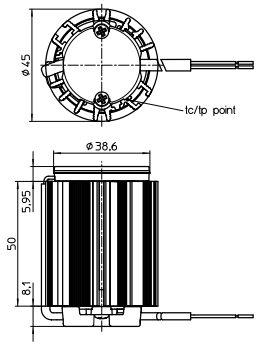
Type	Ambient temperature range (t_a)		Operation temp. at t_c point with max. current		Storage temperature range		Max. allowed repetitive peak current
	°C min.	°C max.	°C min.	°C max.	°C min.	°C max.	mA
Engine/Active VCA2-123	–20	+45	–25	+80	–40	+90	600

Temperatures depend on installation situation and has to be checked by the luminaire manufacturer.

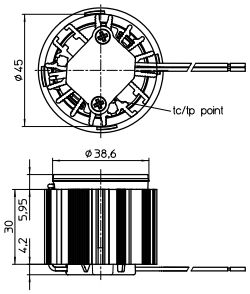
A – Engine 350 mA



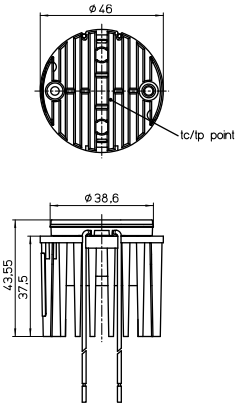
B – Engine 300 mA



C – Engine 200 mA



D – Engine 150 mA



E – Engine Halo

Reflector PLUS	30	370x290x35	10-	700
Lenses Evolve 50	30	370x290x35	15	850
Active PLUS - 350mA	28	600x400x90	120	3280
Active PLUS - 300mA	45	600x400x105	110	5350
Active PLUS - 200mA	45	600x400x80	90	4450
Active PLUS - 150mA	45	600x400x105	110	5350
Active PLUS HALO	28	600x400x105	150	4000

EPREL information

Engine & Active PLUS VCA2-123 are a containing product of LED modules:
VS Type: VCA2-123-927; VCA2-123-930; VCA2-123-940

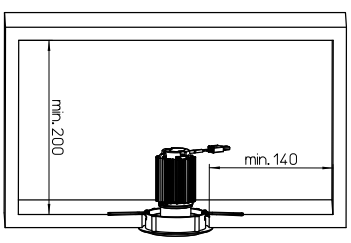
Light Source

Containing product ReadyLine C07-E Type	Light Source Type	EPREL Regi. No.	EE Class
Engine VCA2-123 927	VCA2-123-927	857254	E
Active VCA2-123 PLUS 927	VCA2-123-927	857254	E
Engine VCA2-123 930	VCA2-123-930	857255	E
Active VCA2-123 PLUS 930	VCA2-123-930	857255	E
Engine VCA2-123 940	VCA2-123-940	857258	E
Active VCA2-123 PLUS 940	VCA2-123-940	857258	E
HALO	WU-M-618	901672	F

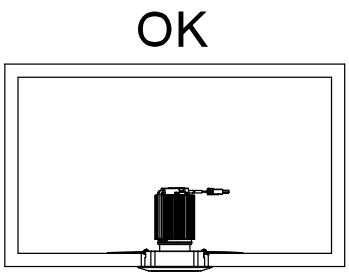
General safety and installation instructions

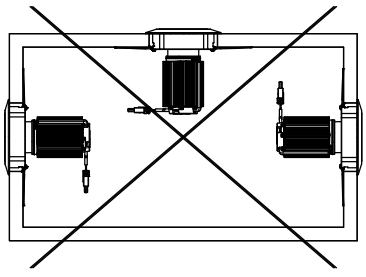
- VS product may only be installed and commissioned by authorised and fully qualified staff.
- These instructions must be carefully read before installing and commissioning the system, as this is the only way to ensure safe and correct handling.
- An external constant-current driver is required.
- Before any work is carried out on the equipment, it must be disconnected from the mains.
- All valid safety and accident-prevention regulations must be observed.
- The products should never be inexpertly opened. Repairs may only be undertaken by the manufacturer.

Built-in



Correct position





Product guarantee

- 5 years
- The conditions for the Product Guarantee of the Vossloh-Schwabe Group shall apply as published on our homepage (www.vossloh-schwabe.com). We will be happy to send you these conditions upon request.

LED Constant Current Drivers

Please visit our homepage for details for suitable
LED constant current drivers:
www.vossloh-schwabe.com

Assembly and Safety Information

Installation must be carried out under observation of the relevant regulations and standards. The LED modules are designed for operation within a casing or luminaire. Safety regulations acc. to EN 60598 has to be observed. Installation must be carried out in a voltage-free state (i.e.disconnection from the mains).

- Mains frequency: 0 Hz
- LED built-in modules must not be subjected to any undue mechanical stress, e. g.:
  - handle LED modules carefully
  - avoid shear and compressive forces onto the optics during handling and installation
  - do not carry or move the LED engines by using the wires
- When installing/screwing the module into a luminaire, please ensure that the cables are not squeezed between luminaire and LED engine.
- The LED engine must not be used in hermetically sealed casings.
- Safe operation only possible by the use of external constant current sources ($I_{max.}$ see table "Electrical Characteristics").
- Operation is dependent on constant current drivers that should provide the following protective measures:
  - short-circuit protection
  - overload protection
  - overheating protection
  - SELV; Umax ≤ 60 V
  - Imax must not be exceede
- Please ensure the correct polarity of the leads prior to commissioning. Reversed polarity can destroy the modules.
- The maximum output of the power supply must be observed.
- For optimal load of used constant current driver the modules can only be connected in series. The quantity of LED modules is limited by the sum of forward voltage and the capacity of used constant current driver. Safety regulations acc. to EN 60598 has to be observed if the sum of forward voltage exceed the permitted touchable value.
- A parallel connection of the LED engines is not allowed.
- Measurement tolerances:
  - luminous flux: ± 10 %
  - voltage: ± 3 %
  - CRI: ± 1 %
- Maximum allowed number of switching cycles: 15,000
- Please ensure standard ESD (electrostatic discharge) protection measures are employed when handling and installing LED modules. Electrostatic discharge can damage LEDs.
- To ensure problem-free operation, the specified maximum temperature at the t_c and t_p point (see "Operating Life") must be observed (measured in accordance with EN 60598-1). To satisfy this point, it is necessary to put measures in place to ensure any heat is dissipated from the LED engine to the environment.
- To ensure good thermal behaviour take care about "general safety and installation instructions".
- In the event of outdoor applications or applications in damp locations, care must be taken to protect LED assembly modules against humidity, splashes and jets of water. Any corrosion damage resulting from humidity or contact with condensation will not be recognised as a defect or manufacturing fault. LED assembly modules are not specially protected against foreign bodies or dust. Depending on the type of application, further protection must be ensured to prevent dust and foreign bodies from entering.
- Operating LED modules in the presence of certain chemical substances or in chemically enriched (aggressive) environments can impair module functionality or even cause total module failure. Detailed information can be found in our "Chemical Incompatibility" PDF on our website www.vossloh-schwabe.com
- The photobiological safety of the LED modules must be classified into risk groups in accordance with EN 62471
  Rating in accordance with IEC / TR 62778

  The following LED modules are in risk group 1:
  Up to 4000 K

LED module type	Max. allowed luminous flux per module (lm)	For higher luminous flux: E threshold to RG1 (lx)
VCA2-123	1692	1464

Applied Standards

EN 62031
LED modules for general lighting – Safety specifications

EN 62471-2
Photobiological safety of lamps and lamp systems
