

## HONG KONG INTL LIGHTING FAIR (AUTUMN EDITION) 2016

At Vossloh-Schwabe we strive to deliver the latest in innovative Smart Lighting Solutions and experiences. Highly efficient LED systems, combined with intelligent light control solutions and matching optic attachments to ensure optimum light distribution guarantee the right kind of light for almost any application when and where it's needed.

Discover the latest LED developments in 'Retail' and 'Office' lighting applications with interactive demonstrations, personalised lighting control and easy to use out-of-box solutions.

Try out our new digital phase-cut LED dimmer with Bluetooth® SMART a stylish 'must have' device for smart homes and residential applications. The new XSW-E6 Wireless Light Controller has opened up a new chapter in light control for DALI luminaires offering users particularly easy and flexible integration of light control options into a system or luminaire. Easy integration established in our LiCS light management systems provides an immediate and noticeable savings potential and ensures full compatibility and reliability in the application.

We look forward to your visit and would also be happy to make a personal appointment with you ahead of time. Please contact your VS representative.
