## Taoyuan Airport Terminal 2 Taiwan

Taoyuan Airport is an international airport serving Taipei and northern Taiwan. Located about 40 km west of Taipei in Dayuan District, Taoyuan, the airport is Taiwan's largest. It has been the busiest airport in Taiwan for a long time. It is operated by the Taoyuan International Airport Corporation. In 2016, it was ranked the best airport for its size in the Asia-Pacific

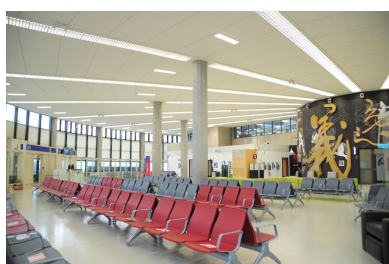

region by Airports Council International.

Cooperated with Chin Tong Chang Enterprise Company, Limited., one of Taiwan's famous companies engaged in lighting equipment manufacturing industry, we applied our VS products to the lighting equipment of the airport terminal, which provides strong support for the normal operation of

the airport.

In this project, we mainly used Easyline Simple Fix C-R1 LED drivers, which have compact casing design and have high efficiency at full load that is over 90%. Besides, it is worth mentioning that there is no stroboflash in the lighting equipment when using this product.

In order to ensure the normal operation of the circuit, the LED driver meets the requirements of overload protection, electronic short-circuit protection and so on. In this way, VS products provide strong support for airport lighting and facilitate the travel of passengers, thus gaining the trust of customers.

## Interview with Theo: Asian Market is Promising Germany

The interview with Theoharis Kritharidis(Theo), the general manager of our Marketing & Product Management Department on September 6 mainly focused on the current situation and future development of the Asian market.

When it comes to opportunities and challenges that lighting industry will face with the transformation from traditional lighting to intelligent lighting, Theo said the most important driver for the lighting industry in last years has been the energy efficiency, also due to the increasing market penetration of LED as a new light source. The technological development of LEDs has brought about a continuous improvement in lighting quality and the design of product solutions to optimally meet the individual needs of users. The opportunities provided by integrated intelligent lighting solutions – have become another focal point, and the use of the lighting infrastructure to support applications outside the scope of actual lighting is growing.

Theo also expressed that lighting is everywhere, connected and digital, therefore the relevant trends for the lighting industry currently include “connectivity”, meaning intelligent lighting, as well as the growing demand for comprehensive, integrated service offers. Light is predestined to become the base for the infrastructure of the Internet of Things (IoT). The Internet of Things will create new and better experiences and services for the retail trade, buildings and cities and unlock a wide range of opportunities for the development of innovative business models. VS is investing in this business grow developing & offering the right IoT Hardware and service solutions.

For the future development, Theo indicated that an expansion of the sales organization, local warehouses and strong supplier partnerships are the focus of our Asian market. Besides, we further want to generate substantial value for our customers. Through our extensive knowledge and leading technology, we will ensure high quality lighting products and services with primary attention to human needs and protecting the environment. That is, VS thinks light for you!

## Oktoberfest Party at VS Headquarter in Schorndorf Germany

On September 16, VS Germany held an Oktoberfest-themed summer party in the parking lot of the company's headquarter in Schorndorf, opening a toast to the largest folk festival in Germany, the Stuttgart Oktoberfest, which was formed in 1818 to celebrate a bumper harvest.

The Oktoberfest celebration began in the afternoon and ended in the evening. The activity content was very rich, including throwing, tug-of-war, winning raffle tickets and so on. Besides, VS specially arranged food trucks to provide different German cuisine during the event, like

Schweinehaxe, Weiswurst, Pretzel, Prost beer and Lebkuchenherz that hanging around everyone's neck.

The successful holding of the party increased everyone's belonging to the company and in the future, we will join hands to make our projects better.
