

LED CONVERTERS FOR LED MODULES 24 V

Electronic Converters for LED Modules 24 V

If LED modules are used that are connected in parallel, this system is activated. The advantages include easy extendibility and system safety on account of SELV (Safety Extra Low Voltage) or low voltage.

The electronic converters made by Vossloh-Schwabe guarantee a broad output range at a voltage of 24 V. Typical areas of application are architectural and general lighting, the replacement of halogen lamps as well as furniture lighting.

Devices with the particularly high IP67 degree of protection are designed for use in outdoor applications.
